

sacred earth foundation

A community Stewarded Land Trust
Preserving and Protecting our Earth with Reverence

Statement of Intent

1. To hold Sacred Earth Foundation lands in trust and stewardship. As we become clear about our real reasons for being here on this planet, we will recognize that our planet itself is a living organism co-evolving with humankind. Then we shall become worthy of stewardship. When we see ourselves as stewards of our planet and not as owners and masters of it, there shall be lasting satisfaction from our labors. Sacred Earth lands are never to be sold, encumbered, or looked at as a personal asset. We recognize the Earth as a gift from the Creator and accept the role of caretaker and the responsibility for ecological balance and harmony. Any and all contributions, whether monetary, physical, material, or spiritual, are given freely.
2. To develop a community of all life that combines the essential principles of spiritual awareness, connection with nature, and appropriate lifestyle in order to create a holistic, nurturing environment that enhances and sustains the quality of life on Earth.
3. To develop and foster a healthy family atmosphere that respects individual spiritual awareness and acknowledges the importance of children as well as the elderly. To encourage an extended family that can care for, share with, and love one another. To have faith in and acceptance of the changes we must all go through to grow into a state of unconditional love, having forgiveness in our hearts even during times when understanding is difficult.
4. To promote the development and education of all children and adults through (a) nature awareness, (b) indigenous life skills, (c) organic and environmentally appropriate permaculture, (d) appropriate, nonpolluting methods of energy production, (e) workshops and seminars, and (f) healing arts.
5. To help create and foster a sanctuary where the meek and tender-hearted spirits of the Earth will have a place to let their hearts be known.

Our foundation is based on our commitment to a sustainable future, to regeneration of our planet, and to becoming whole and happy people with a remembrance of the spirit of oneness that moves in all things.
